**Acceleron**  
Technology 101: Tech Landscape  
PS038A

**Instructor Prep Guide**

**Unit Description:**  
This unit takes a look at the ever-changing landscape of technology. From smartphones to apps to one click ordering and social media, there are a lot of options in technology out there that are new and possibly confusing. This unit addresses topics related to:

- Hardware (smart phones, tablets, computers)
- Apps and online content
- Finding trustworthy sources
- Being safe and smart online
- The social and financial costs of technology

**Unit Materials:**  
The materials for this unit that the students will need are:

- Worksheets (Page 5)
- Pencil

**Websites:**  
The websites mentioned in this video are:

- facebook.com

**Context and Setup:**

**Historical**  
The Internet came into existence as we know it in 1990 with one website. Now there are over 200 million websites. Among these websites, are the likes of CNN and BBC. Facebook first came on the scene in 2004. Twitter was introduced in 2006. Tech has rapidly progressed in the past few decades. Just as we get a handle on the idea of a personal computer like a laptop, we've handed a cell phone that fits in the palm of our hand, like a small Atari with each piece of new technology asks new ways to consume and create content from technology. Take the concept of trying to send a message to a loved one. We started with handwritten letters, delivered on foot. From there we went to the telegraph system which allowed electronic transmission of messages, to telegrams and eventually email, instant messaging on Facebook. Communication that used to take weeks or even months now happens in a matter of seconds.

**Social**  
The Internet and it's surrounding technology has had a huge impact on our social lives. We have it to be plugged in and connected in almost every aspect of our life. This can lead to information overload, whether it's the 24 hour news cycle on CNN or our friends constantly updating their Facebook feeds. It's important to remind ourselves that life exists in the real world FIRST and technology is just a tool.

**Technology 101: Tech Landscape**

Name: \_\_\_\_\_

1. \_\_\_\_\_ if you get an email from a stranger asking for money:
  - a. Do not respond and delete it
  - b. Send them the money
  - c. Respond to the email and ask why they want money
  - d. Respond to the email and give them your bank account information
2. \_\_\_\_\_ Choose the option below that is NOT true:
  - a. You should always have the latest technology because it's the best
  - b. You should check your budget and only buy a gadget if you can afford it
  - c. Often, newer is not always noticeably better
  - d. Companies make new gadgets every year hoping you'll spend money to upgrade
3. \_\_\_\_\_ True or false, CNN and NPR are good examples of reputable news websites.
4. \_\_\_\_\_ True or false, you shouldn't tell a person online something you wouldn't tell a stranger face to face.
5. \_\_\_\_\_ Choose the option below that is a positive reason to be on social media:
  - a. To be distracted from real life
  - b. To be envious of other people's lives
  - c. To stay connected with positive friends and relatives
  - d. To stay connected with your former bad influences
6. \_\_\_\_\_ Choose the option below that is TRUE.
  - a. The IRS will call you or email you if you have a problem with your taxes
  - b. The IRS only corresponds with you via regular mail
  - c. If you get an email from your bank saying your account was hacked, you should not call your bank to follow up
  - d. Emails saying you've inherited a large sum of money are true
7. \_\_\_\_\_ True or false, [www.800253.com](http://www.800253.com) is a good website to fact check any email you get that or news story that you think sounds fishy.

**4. THE WORKPLACE**  
Technology Skills: The Workplace PSC690

**Instructor Prep Guide**

**Unit Description:**  
Learn about how technology affects job search and research on-line. Learn how to communicate using different means and with different audiences. This unit addresses topics related to:

- Working with new technology
- Communicating in different formats
- Communicating with different audiences
- Using technology in your job search
- Avoiding e-mail and scam jobs

**Unit Materials:**

The materials for this unit that the students will need are:

- Worksheets (Pages 5 & 6)
- Pen(s)

**Websites:**

The websites mentioned in this video are:

- slip.gov
- slip.org
- slip.com
- facebook.com
- linkedin.com
- indeed.com
- zillow.com
- careerbuilder.com
- angloinfo.com
- monster.com
- slip.google.com
- slip.com
- skype.com

**The Lesson Presentation**  
Technology Skills: The Workplace PSC690

**1. Introduction to the Lesson (Continued)**

**Historical Context**  
In 1876, Alexander Graham Bell patented his first telephone. In 1877 the first transatlantic telephone call was made. In 1946, ENIAC, the first computer, was introduced. ENIAC weighed 30 tons and took up multiple rooms. In 1948, there was the introduction of the first desktop computer. In 2007, the iPhone was introduced. Technology has made great leaps and bounds since the early days. It has influenced our everyday lives and become common in our workplace. Now, it's taken for granted that employees will have basic computer skills. Understanding how to use technology and its applications in the workplace is key to remaining hireable and productive.

**Social Context**  
Understanding how communication works in a digital world is important for success in the workplace and in personal life. Each method of communication (email, text, social media, phone calls) needs a different approach. It's also necessary for communication to be tailored to your audience.

**Personal Context**  
When you are incarcerated, your avenues of communication and access to job-searching materials are limited. Upon release, it can be intimidating to step back into a world of instant communication. Knowing what to share and when, and understanding that nothing on the internet is private, is key. You must learn how to navigate job-search websites and post your resume electronically. Lastly, you must consider what additional technology training (formal or informal) will help you advance your career. There is much free education available from sites like k12.org, coursera.org, and youtube.com.

**2. Show Video Part 1 (After, ask for "take-aways," using points on page 5)**

**3. Discussion Questions Video Part 1**

- We talk about changes in technology in this video. Specifically we talked about how technology has changed job hunting. If you've looked for jobs in the past, how did you search for your job?
- What are some advantages you see to using the internet to search for a job?

Potential responses to question 1: (answers may vary)

- Friends or family
- Want ads
- Help-wanted sign in window
- Walked in and filled out an application
- Internet
- Job center

Potential responses to question 2: (responses will vary)

- A lot of job postings
- Easier to look for jobs than I have to go door-to-door asking for work
- You really can weed out jobs you're not qualified for
- You can do research on the company before you apply

Page 2

**Technology Skills: The Workplace PSC690**

**3. Why would a post on Facebook about how you hate your job and got high last night be inappropriate and harmful to you?**

Potential responses to question 3: (answers may vary)

- Your boss might see the post and decide to fire you.
- My parole officer might see your post and you could be in trouble for violating the terms of your parole.
- Friends/family might see your post and tempt you to keep posting wrong.

**4. How can you use the Occupational Outlook Handbook to look for a job?**

Potential responses to question 4: (answers may vary)

- It could help you avoid a dead end job.
- The OOH shows you jobs that are right for your skill level and education level.
- The OOH could give you ideas for classes you might want to take for new job skills.

**3. How can a functional resume help you get hired?**

Potential responses to question 3: (answers may vary)

- Short and to the point.
- Highlights your experience.
- Minimizes gaps of employment and lack of work experience.

**4. Show Video Part 2 (After, ask for "take-aways," using points on page 5)**

Page 3

**Technology Skills: The Workplace PSC690**

**5. Discussion Questions Video Part 2**

- What are some computer skills you would like to have or learn in order to make yourself more hireable?
- If an application asks for your criminal history, why is it important to respond, I will explain in the interview?

Potential responses to question 1: (answers may vary)

- Learning how to use Microsoft Office
- Learning how to operate a computer and perform basic computer maintenance
- Learning how to write computer code or design a website
- Learning how to operate diagnostic machinery
- Learning how to use Google Apps

Potential responses to question 2: (answers may vary)

- Lets employers know you aren't hiding anything
- Gives you a chance to explain your story on your terms
- Gives you a shot at actually being called back for an interview
- Allows you to demonstrate honesty and integrity by telling the truth

NOTE: When explaining, be brief and honest. That isn't the focus necessarily to something positive. The education you received while incarcerated, or work experience, or personal growth, or the classes you provide for your family.

- Why is it important to be realistic when searching for a job?
- What are some red flags that a job is a scam and not a true job opportunity?

Potential responses to question 3: (responses will vary)

- If you apply for jobs you're not qualified for, you'll get rejected a lot and discouraged.
- You might miss out on jobs that would be a really good fit for you.
- You can try to find jobs that are directly to ex-offenders.

Potential responses to question 4: (responses will vary)

- You have to buy product upfront or resell.
- The person offering you the job won't tell you the name of their company right away.
- Somebody approaches you in a store and asks if you're ready for the "opportunities of a lifetime."
- Multiple meetings are required before you find out anything about the job.

**6. Quiz (Grade during activity, then review/return.)**

Page 4

**Technology Skills: The Workplace PSC690**

**5. Activity**

**Descriptions of the activity:** The first part of the activity will give you a chance to apply what you learned about communication using technology. The second part will help you determine what technology skills you already have and what skills you can add to your skillset. Finally, you'll come up with a plan for adding the new skills you want to have.

- With a partner, read each scenario and determine which method of communication is appropriate from this list: text, email, phone call, face to face communication. More than one may apply. Discuss.
- In column 'A', list any computer skills you already have that would be useful in the work place. In column 'B' list computer skills you'd like to have that would be useful in the work place.
- For items in Column 'B', use the space on page 6 to write out three or four (or more) ways you could work on getting those skills either now or when you are released.

**Suggestions:**

- Take a class offered on computer skills
- Check out a YouTube video or use Google to search for "how to..." steps
- Practice making basic documents (resume, business letter, letter) on library computer
- Taking a beginner's coding class at local library or community college, or use online education websites like udacity.com

**Key Take-Aways from the Video**

Video Segment 1

- When searching for a job that is in high demand, your first stop should be the **Occupational Outlook Handbook** from the Bureau of Labor Statistics.
- LinkedIn is an online professional **networking** site that you can use to help with your job search.
- Keep your resume to **one** page putting your contact information and a two sentence summary of your skills at the top.

Video Segment 2

- Know your **skills**. If you are slow at typing, then don't apply for secretary jobs.
- Because our world is so computerized, jobs in **technology** are very popular.

Page 5

To run the course, you'll also need...

- TV or projector/speakers
- Internet or DVD player
- Access to a photocopier
- Pencils or pens
- Tables and chairs
